DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/1/11 has been entered.

Drawings

2. The drawings were received on 4/26/10. These drawings are acceptable.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-18 and 20-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gutta et al (WO 02/071315) in view of Liu (6,553,281) and Jeong (6,348,928) for the same reasons as set forth in the previous office action, dated 8/18/10.

With respect to the newly amended limitation, the Summary of the Invention of Gutta et al already discloses the concept of such common proximity detector provided to detect an obstacle (e.g. a second person), in addition to the subject (e.g. user), present near the arm assembly, wherein the proximity detector is interfaced with the processor to prevent movement

of the arm assembly (e.g. obstructing the view of the second person) while the obstacle is detected.
